What is Study Smart?

- A 10-week pilot project for students in grades 6-8 and 9-12.
- Teaches organizational and time management skills necessary in order to become a good student.
- Includes study skills, test-taking skills and assignment management skills.

Why Learn Study Skills?

The key to success for students at any level of education is not as dependent on measured intelligence so much as the habits and attitudes that the students bring with them. Students *can*

Planning, organization and knowledge of learning strategies can help .

learn how to be good students and they *can* develop skills to help them achieve their goals.

To do well over the school year requires planning, organization and knowledge of learning strategies.

These skills are attainable by any student, if they are given the correct strategies and time to reinforce these strategies. Study Smart will give students the tools to experience success, which in turn will foster dedication and motivation.

Program Outline

Week One: **What type of learner are you?**

Students assess their learning style preferences to learn how to study according to their learning preferences.

Week Two: **Time Management**

Students learn how to set goals and priorities to get the most out of their day.

Week Three: **Your Planner is Your Friend**

Students learn how to effectively use their school planners.

Week Four: **Note-taking Skills**

Students learn how to organize their note-taking and effectively take notes during class.

Week Five: **Organizing Notebooks**

Students bring in their notebooks and learn how to organize them effectively.

Week Six: **Organizing Your Desk/Locker**

Students learn methods for keeping their desk/locker organized.

Week Seven: **Keeping Track of Assignments**

Students learn strategies for organizing the steps to completing an assignment on time.

Week Eight: **The Studying Environment**

Students learn how to prepare for studying so that they can make the most of their studying time.

Week Nine: **Study Smart Skills**

Students learn strategies for remembering material they have studied and how to study material effectively.

Week Ten: **Test-Taking Skills**

Students learn strategies for taking different types of tests.
